

## How to Install ADM (64-bit)

---

Please ensure you are logged in as Administrator before complete the following:

1. Navigate to [Nightingale MD](#) website to install necessary files
  - a. Mouse-over **Resources** tab and click **Downloads** tab
  - b. Select the correct **ADM download**

Select:	If you log into NOD with this URL:
ADM 64-bit - OMD East	<a href="https://rsa-on.mynightingale.net">https://rsa-on.mynightingale.net</a>
ADM 64-bit - ON MD	<a href="https://ont.nightingale.md">https://ont.nightingale.md</a>
ADM 64-bit - AOHC	<a href="https://aohc.nightingalemd.com">https://aohc.nightingalemd.com</a>
ADM 64-bit - East	<a href="https://nod.nightingalemd.com">https://nod.nightingalemd.com</a>
ADM 64-bit - West	<a href="https://rsa-west.mynightingale.net">https://rsa-west.mynightingale.net</a>
ADM 65-bit - West2	<a href="https://west2.nightingalemd.com">https://west2.nightingalemd.com</a>

- c. Save the zip file to your **desktop**
2. Unzip the file which contains the following 5 files:
  - a. **ADM-64bitfix.bat**
  - b. [Environment\\_ADM\\_v2.5reg](#)  
(where [Environment](#) is one of OMD, AOHC, OMD\_East, East, West, West2)
  - c. **Nightingale\_ADM\_2.5.2exe**
  - d. **Install\_ADM\_64bit\_Instructions.pdf**
  - e. **UninstallADM.pdf**
3. If ADM is already installed, please follow the instructions to uninstall ADM as outlined in **UninstallADM.pdf** before installing the new version of ADM

**NOTE:** Before uninstalling ADM, ensure that your **Available Files** folder is empty or backed up. You can find this folder under:

C:\Program Files\Nightingale\ADM2\Available files

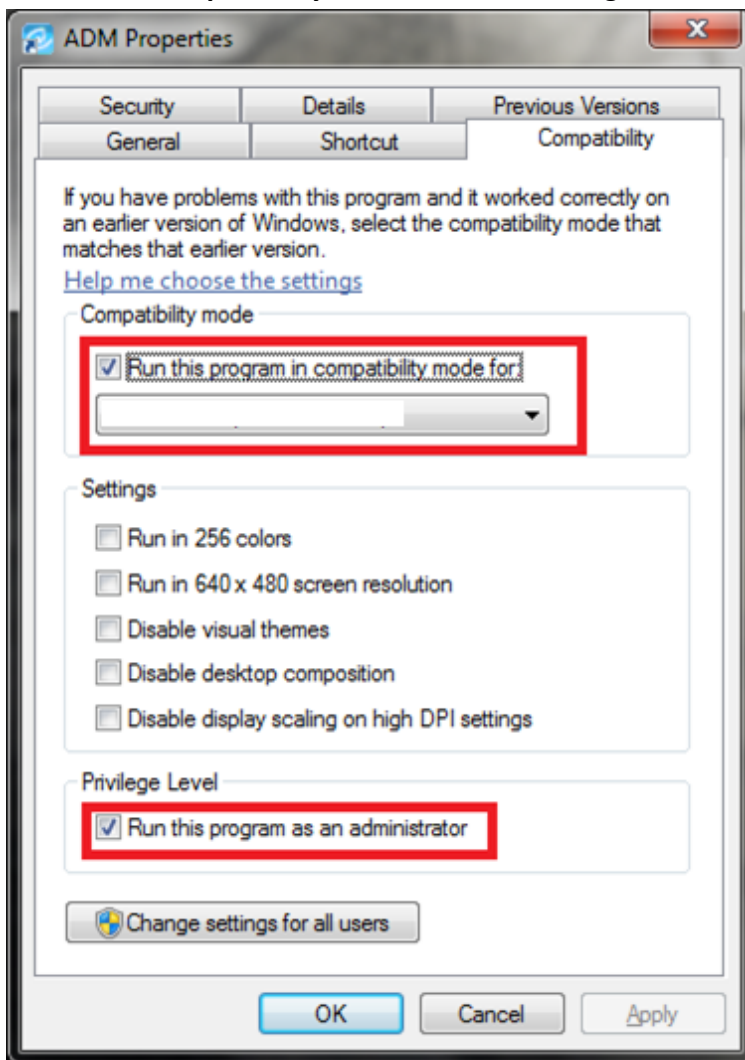

or

C:\Program Files(x86)\Nightingale\ADM2\Available files

4. Run **Nightingale\_ADM\_2.5.2.exe**, follow on-screen instructions to install
5. Locate ADM desktop shortcut

6. Right-click shortcut and click on **Properties**
7. Under the **Compatibility** tab ensure the settings are as follows

8. Click **OK**

9. Run the **ADM\_v2.5.reg** from desktop, click Yes to all prompts
10. Run the **ADM-64bitfix.bat** from desktop, click Run when prompted
11. Launch **ADM**, login with username as set-up in NOD
12. Once you log into ADM successfully go to **Tools > Options > Select "Twain" > Click "OK"**
