

## Med Access EMR

Enhance patient care with an advanced web-based EMR.

Designed to help primary care physicians and specialists deliver the highest level of care, Med Access is a web-based EMR solution that is easily customized to your clinic's needs. Future-proof your practice with robust reporting, powerful task management and the ability to connect to patient charts from anywhere you have an Internet connection.

### **View patient information on a single screen.**

Access key patient information without leaving the screen so you can make decisions quickly and confidently.

### **Customize your workflow.**

Save time and minimize data entry with configurable dashboards and templates for your workflow, encounters, referrals and prescriptions.

### **Simplify disease management.**

Take advantage of intelligent dashboard tools to identify at-risk individuals and help manage your patients with chronic diseases.

### **Improve operational efficiency.**

Increase productivity with streamlined billing, integrated scheduling and other office tools.

### **Drive better patient outcomes.**

Use the goals management feature to set population and individual patient health goals and engage patients in their own self-care.

### **Stay connected in the clinic and on the go.**

Remotely connect to your EMR and provide care on the go – right from your mobile device, with our complimentary TELUS EMR Mobile app.

Increase clinic efficiency and improve the patient experience.

Optimize your workflow, increase collaboration with other healthcare professionals and engage your patients in their own care with powerful add-on tools and services that integrate with your Med Access EMR.

**Provider-to-provider communications**

Exchange and store unlimited digital and eFax communications with other healthcare professionals with MedDialog.

**Automated appointment reminders**

Reduce no-shows with customizable patient appointment reminders that can be sent by email, text or phone.

**Online appointment booking**

Let patients book their own appointments online and sync schedules with your EMR.

**Patient portal**

Stay connected to your patients with private messaging and group communications through a web-based, customizable portal.

**Digital patient forms**

Have patients complete forms online before they arrive or on a tablet in your clinic with information imported into your EMR.

**Wait room management**

Manage patient expectations with digital screens that display wait times and patient queue information.

**You're passionate about better patient outcomes. So are we.  
By working together, we can improve care delivery across the health continuum.**

Turning information into better health outcomes for Canadians.
